[REDACTED]

[REDACTED] To vindicate its patent rights, Regeneron brings this Complaint<sup>1</sup> pursuant to 28 U.S.C. §§ 2201-2202 and under 42 U.S.C. § 262(I)(9)(A)

---

<sup>1</sup> As explained in its forthcoming memorandum in support of its motion to seal, Regeneron is bound by the provisions of 42 U.S.C. § 262(I)(1), which dictate that Bioepis determine, “in its sole discretion,” what information constitutes Bioepis confidential information, that no such “confidential information shall be included in any publicly-available complaint or other pleading,” and any violation of paragraph 1 could result in “irreparable harm for which there is no adequate legal remedy” and for which “the court shall consider immediate injunctive relief to be an appropriate and necessary remedy.” Therefore, Regeneron initiates this case by filing a public version of this Complaint with redactions to any information that Bioepis has represented is Bioepis confidential information.

seeking declaratory judgment of patent infringement against the Defendant under 35 U.S.C. §§ 271(a)-(c) and (g), and a judgment of patent infringement against the Defendant under 35 U.S.C. § 271(e).

### **NATURE OF THE CASE**

1. Regeneron is a leading science-based American biotechnology company dedicated to improving human health and tackling the most urgent medical issues facing the Nation. Founded and led for over 30 years by physician-scientists, Regeneron has developed life-transforming medicines for people with serious diseases, including cancer, atopic dermatitis, asthma, eye diseases, cardiovascular and metabolic diseases, Ebola, and COVID-19, which have been used across the country. Regeneron's cutting-edge scientific advances are supported, in large part, by its ophthalmic product, EYLEA<sup>®</sup>, which FDA approved in 2011.

2. EYLEA<sup>®</sup> has been administered millions of times to treat certain ophthalmic disorders that, if left untreated, can lead to permanent blindness. Its active ingredient is a genetically engineered fusion protein called aflibercept. It works by blocking the overproduction of a naturally occurring protein in the eye that can cause the formation of new blood vessels, leading to vision loss. Based on extensive clinical testing by Regeneron, FDA approved EYLEA<sup>®</sup> in 2011 to treat an ophthalmic disorder called neovascular (wet) age-related macular degeneration ("wAMD") and in 2014 to treat diabetic macular edema ("DME"). As a result of Regeneron's additional clinical testing, EYLEA<sup>®</sup> is now also approved for use in treating other serious disorders of the eye: macular edema following retinal vein occlusion and diabetic retinopathy. Most recently, FDA granted approval for EYLEA<sup>®</sup> to treat retinopathy of prematurity in preterm infants, which is the leading cause of childhood blindness worldwide. In addition to benefitting the many patients it has been used to treat, EYLEA<sup>®</sup> is also a critical source of research and development funding

for Regeneron to develop other life-transforming medicines.

3. [REDACTED]

[REDACTED] Enacted in 2010 as part of the Affordable Care Act, the BPCIA provides for an abbreviated regulatory approval pathway for biosimilars by letting applicants rely on the extensive clinical testing previously conducted, at great expense, by the innovator company that developed the medicine the applicant wants to copy. *See Sandoz Inc. v. Amgen Inc.*, 582 U.S. 1 (2017).

4. [REDACTED]

5. [REDACTED]

[REDACTED] Regeneron files this action to obtain relief before Bioepis launches SB15 in the United States.

7. On information and belief, Bioepis is a company organized and existing under the laws of the Republic of Korea with its principal place of business located at 76, Songdogoyoyuk-

ro, Yeonsu-gu, Incheon, Republic of Korea. Bioepis is a biopharmaceutical company that specializes in research and development of biosimilars and biopharmaceuticals.

8. On information and belief, Bioepis, directly or indirectly, manufactures its drug products abroad. On information and belief, Bioepis directly, or via its subsidiaries, affiliates, or other agents, develops, distributes, or sells within the United States or imports into the United States Bioepis's drug products, including SB15, under the general direction and control of Bioepis. Non-limiting examples are provided below.

9. Bioepis is the holder of aBLA No. 761054 for RENFLEXIS, an approved biosimilar of Remicade. On information and belief, Bioepis manufactures and imports RENFLEXIS, directly or indirectly, into the United States. For example, between April 2, 2020 and October 22, 2023, Bioepis imported 72 shipments of RENFLEXIS into the United States. As another example, between August 17, 2019 and October 25, 2023, Samsung Biologics Co. Ltd. ("Samsung Biologics")—the corporate parent of Bioepis—imported 57 shipments of RENFLEXIS into the United States.

10. [REDACTED] On information and belief, between August 29, 2021 and March 28, 2023, Bioepis imported or directed one or more of its subsidiaries, affiliates, or agents to import 17 shipments of SB15 into the United States. Each of these shipments contained product described as "AFLIBERCEPT (INHIBITOR (GROWTH FACTOR))." On information and belief, between July 2, 2019 and June 8, 2023, Samsung Biologics imported or directed one or more of its subsidiaries, affiliates, or agents to import 19 shipments of SB15 into the United States. Each of these shipments contained product described as "AFLIBERCEPT (INHIBITOR (GROWTH FACTOR))."

11. On information and belief, Bioepis and its respective subsidiaries, affiliates, and agents will function as an integrated organization and a single business enterprise in the manufacture of SB15, in the importation of SB15 into the United States, and in the sale or offer for sale of SB15 in the United States.

12. On information and belief, Bioepis and its respective subsidiaries, affiliates, and agents develop, manufacture, distribute, sell, and/or import drug products for the entire United States market and do business in every state, including West Virginia, either directly or indirectly.

13. This action arises under the BPCIA, 42 U.S.C. § 262(*I*), the Patent Laws of the United States, Title 35 of the United States Code, and the Declaratory Judgment Act, 28 U.S.C. §§ 2201-2202. This Court has subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331, 1332, 1338, 2201(a), and 2202.

14. This Court has personal jurisdiction over Bioepis because [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED] This conduct is “suit-related,” has “substantial connection” with West Virginia, and therefore satisfies the minimum contacts requirement.

15. Alternatively, this Court has personal jurisdiction over Bioepis because Bioepis develops, manufactures, distributes, sells, and/or imports drug products for the West Virginia market, including other biosimilar products such as RENFLEXIS, and because it does business in West Virginia, either directly or indirectly. These activities are so continuous and systematic as to

render Bioepis essentially at home in West Virginia. *Daimler AG v. Bauman*, 571 U.S. 117, 127 (2014).

16. Alternatively, this Court has personal jurisdiction over Bioepis pursuant to Federal Rule of Civil Procedure 4(k)(2).

17. Venue is proper in this District under 28 U.S.C. §§ 1391(c)(3), 1400(b). Bioepis is a foreign corporation and is therefore subject to suit in any judicial district. *Id.*

### **FACTUAL BASIS FOR RELIEF**

18. The BPCIA provides a mechanism to obtain FDA approval for a biological product that is “biosimilar” to a previously licensed “reference product” such as EYLEA<sup>®</sup>. 42 U.S.C. § 262(k). In order to be approved, biosimilars must be “highly similar to the reference product notwithstanding minor differences in clinically inactive components,” with “no clinically meaningful differences between the biological product and the reference product in terms of the safety, purity, and potency of the product.” *Id.* § 262(i)(2)(A)-(B).

19. The BPCIA reduces substantially the time and expense otherwise required to gain FDA approval, by allowing a biosimilar applicant [REDACTED] to rely on most of the prior clinical testing that Regeneron conducted to establish the safety and efficacy of the reference product (EYLEA<sup>®</sup>). Regeneron, the reference product sponsor, invested many years of effort into its design and development of EYLEA<sup>®</sup> and received patents rewarding this research. In exchange for this accelerated and far less expensive application process, the BPCIA obligates a biosimilar applicant to address a reference product sponsor’s relevant patents in a manner that permits adjudication of patent rights before commercialization of the biosimilar product. The BPCIA does so, *inter alia*, through a set of pre-litigation exchanges or steps outlined in 42 U.S.C. § 262(l) (herein referred to as the “patent dance”).

31. 42 U.S.C. § 262(l)(9)(A) provides that, “[i]f a subsection (k) applicant provides the application and information required under paragraph (2)(A), neither the reference product sponsor nor the subsection (k) applicant may, prior to the date notice is received under paragraph (8)(A),

bring any action under section 2201 of title 28 for a declaration of infringement, validity, or enforceability of any patent that is described in clauses (i) and (ii) of paragraph (8)(B).”

32. [REDACTED]

33. Bioepis’s [REDACTED]

[REDACTED], presents a controversy of sufficient immediacy to support declaratory judgment of patent infringement under 35 U.S.C. § (a)-(c) and (g).

34. Regeneron therefore brings this action for a judgment of infringement and declaratory judgment of infringement of patents described in paragraph 8(B)(i) and (ii). 42 U.S.C. § 262(D)(9)(A).

43. Bioepis's commercial manufacture, use, offer for sale, and/or sale within the United States, or importation into the United States, of SB15 before the expiration of the '106 patent will cause Regeneron injury, entitling Regeneron to damages and/or other monetary relief under 35 U.S.C. § 271(e)(4)(C).

into the United States, of SB15 has infringed and/or will infringe one or more claims of the '106 patent. An actual controversy has also arisen and now exists between the parties concerning whether Bioepis has infringed and/or will infringe one or more claims of the '106 patent by actively inducing the importation, use, offer to sell, and/or sale of SB15.

51. Regeneron would be irreparably harmed if Bioepis is not enjoined from infringing claims of the '106 patent. **COUNT 72: DECLARATORY JUDGMENT OF INFRINGEMENT OF THE '102 PATENT UNDER 35 U.S.C. § 271 (b), (g)**

707. Regeneron incorporates by reference all of the allegations set forth above as if fully set forth below.

708. On information and belief, [REDACTED] [REDACTED] the commercial manufacture, use, and/or sale of SB15 before the expiration of the '102 patent.

709. [REDACTED]  
[REDACTED]

710. On information and belief, [REDACTED], Bioepis intends to and will immediately infringe one or more claims of the '102 patent under 35 U.S.C. § 271(g) by

importing into the United States or offering to sell, selling, or using within the United States, directly or indirectly, SB15 manufactured by the process patented in one or more claims of the '102 patent. On information and belief, [REDACTED], Bioepis will induce infringement of one or more claims of the '102 patent under 35 U.S.C. § 271(b) by actively inducing one or more of its subsidiaries, affiliates, or agents to import into the United States or to sell, offer to sell, or use within the United States SB15 manufactured by the process patented in one or more claims of the '102 patent. Bioepis has knowledge of and is aware of the '102 patent at least due to [REDACTED], and the filing of this Complaint. On information and belief, Bioepis has also had knowledge of the '102 patent based on its active monitoring of Regeneron's patents. For example, Bioepis has filed five petitions for *inter partes* review against various Regeneron patents since 2023. On information and belief, Bioepis will manufacture, directly or indirectly, SB15 by using a process patented in one or more claims of the '102 patent. On information and belief, Bioepis will provide this SB15 to one or more of its subsidiaries, affiliates, or agents knowing or willfully blind to the fact that one or more of its subsidiaries, affiliates, or agents will directly infringe one or more claims of the '102 patent.

711. [REDACTED]

[REDACTED], an actual controversy has arisen and now exists between the parties concerning whether Bioepis's use, offer to sell, and/or sale within the United States, or importation into the United States, of SB15 has infringed and/or will infringe one or more claims of the '102 patent. An actual controversy has also arisen and now exists between the parties concerning whether Bioepis has infringed and/or will infringe one or more claims of the '102 patent by actively inducing the importation, use, offer to sell, and/or sale of SB15.

712. Regeneron is entitled to a declaratory judgment that Bioepis has infringed and/or would infringe claims of the '102 patent by using, offering to sell, and/or selling within the United States, or importing into the United States, SB15, or by actively inducing the infringement of Bioepis's SB15, before the expiration of the '102 patent.

713. Regeneron would be irreparably harmed if Bioepis is not enjoined from infringing claims of the '102 patent. Regeneron does not have an adequate remedy at law and is entitled to injunctive relief prohibiting Bioepis from making, using, offering to sell, and/or selling within the United States, or importing into the United States, SB15, or actively inducing the infringement of one or more claims of the '102 patent, before the expiration of the '102 patent.

**COUNT 73: INFRINGEMENT OF U.S. PATENT NO. 7,070,959 UNDER 35 U.S.C. § 271(b), (g)**

714. Regeneron incorporates by reference all of the allegations set forth above as if fully set forth below.

715. United States Patent No. 7,070,959 ("the '959 patent") (Exhibit 34 hereto), was duly and legally issued on July 4, 2006.

716. Regeneron is the owner of all right, title, and interest in the '959 patent.

717. The '959 patent expired on June 16, 2023.

718. The '959 patent claims a system for producing biological products [REDACTED]

[REDACTED]

[REDACTED]

719. On information and belief, Bioepis infringed, *inter alia*, claim 11 of the '959 patent under 35 U.S.C. § 271(g) by importing into the United States or offering to sell, selling, or using within the United States commercial batches of SB15 that were made by an infringing process. On information and belief, these activities fall outside of the activities protected under 35 U.S.C.

§ 271(e)(1) because they amount to stockpiling SB15 for commercial use [REDACTED]  
[REDACTED]

720. On information and belief, Bioepis induced infringement of, *inter alia*, claim 11 of the '959 patent under 35 U.S.C. § 271(b) by actively inducing one or more of its subsidiaries, affiliates, or agents to import into the United States or to sell, offer to sell, or use within the United States commercial batches of SB15 manufactured by the process patented in, *inter alia*, claim 11 of the '959 patent. Bioepis has knowledge of and is aware of the '959 patent at least due to

[REDACTED] and the filing of this Complaint. On information and belief, Bioepis has also had knowledge of the '959 patent based on its active monitoring of Regeneron's patents. For example, Bioepis has filed five petitions for *inter partes* review against various Regeneron patents since 2023. On information and belief, Bioepis manufactured, directly or indirectly, SB15 by using a process patented in, *inter alia*, claim 11 of the '959 patent. On information and belief, Bioepis provided this SB15 to one or more of its subsidiaries, affiliates, or agents knowing or willfully blind to the fact that one or more of its subsidiaries, affiliates, or agents will directly infringe, *inter alia*, claim 11 of the '959 patent.

721. Bioepis's commercial use, offer for sale, and/or sale within the United States, or importation into the United States, of SB15 before the expiration of the '959 patent have caused Regeneron injury, entitling Regeneron to damages and/or other monetary relief under 35 U.S.C. § 271(e)(4)(C).

current or future versions of a product that infringes, or the use or manufacturing of which infringes, the patents in suit;

(e) Damages pursuant to 35 U.S.C. § 271(e)(4)(C), if applicable, in the form of lost profits but in no event less than a reasonable royalty;

(f) A judgment that the infringement has been willful and an enhancement of damages;

(g) An award for an accounting of damages from Bioepis's infringement;

(h) A declaration that this is an exceptional case and an award of attorneys' fees pursuant to 35 U.S.C. § 285 and 35 U.S.C. § 271(e)(4);
